

高电平开启:
J1: NC
J2: 2-3

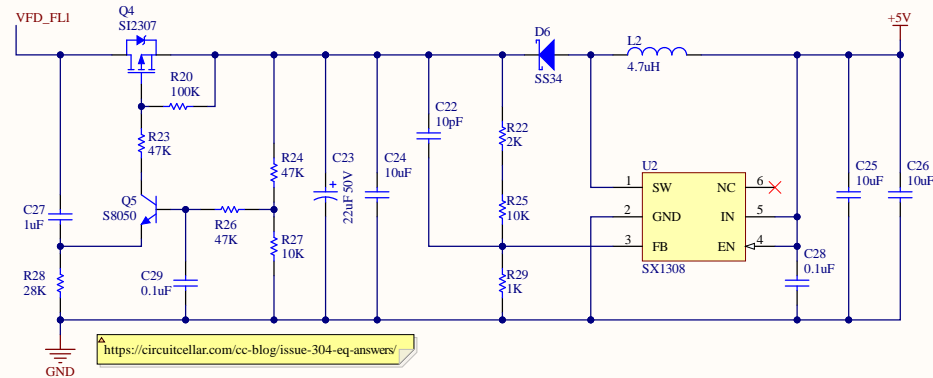

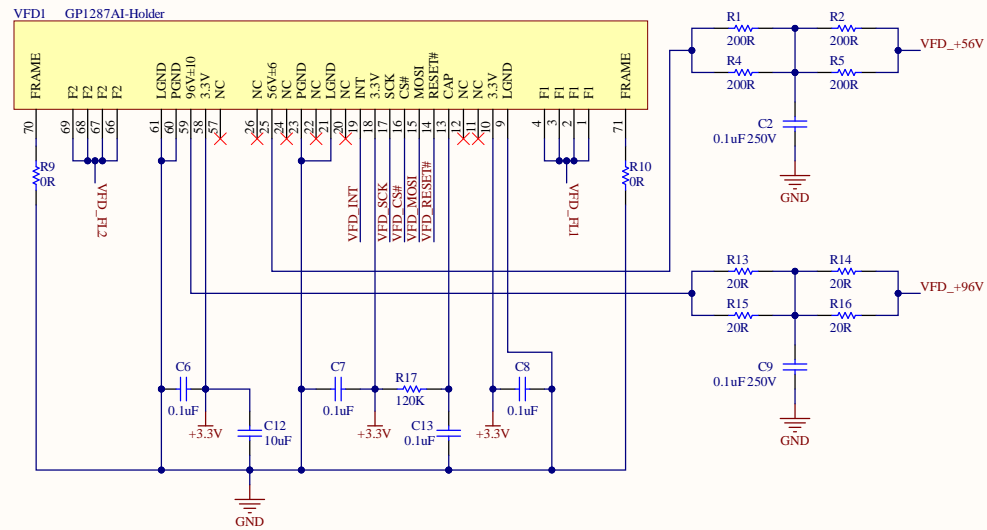

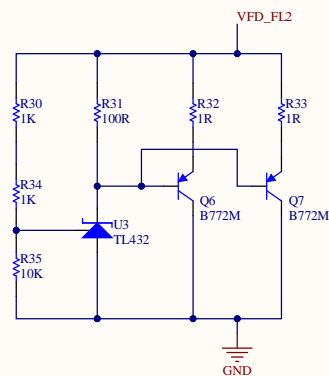

低电平开启:
J1: 1-2
J2: 1-2

当前灯丝偏压已设置为3V以减少发热和功耗，如果需要使用原板的4.1V偏压需要调整电阻阻值：
R22 3.9K、R28 33K、R30 7.5K、R34 330R

非TL品牌、国产购买TL431
TL品牌、仿品购买TL432
区别为需要参考电压R在1脚上，购买时请特别注意

无特殊标注和注译的陶瓷电容均为50V
无特殊标注和注译的电解电容均为16V
